Manufacturing Technique

Economical: Energy Efficient, Low Fuel.

With a high-efficiency zone that increases to 80%, Super DM

Technology has an impressive fuel consumption as low as 6L per 100km.

A potent electric motor, with an exceptional 97% efficiency ensures an economical performance, producing a pure-electric driving range up to 115km, while the combined technology offers a reassuring long range in excess of 1000km in diverse conditions.

Fast: Exhilarating, Responsive and Dynamic

The electric motor boasts an impressive 10ms-level response time, adding a remarkable level of precision to the driving dynamics.

Quiet: Bringing Serenity to Journeys

Noise levels are minimised as the vehicle quietly glides along, whether in the city or on the highway, epitomising the perfect

blend of power, efficiency and NVH excellence.

Smooth: Exceptional Ride Comfort

The Electric Hybrid System embodies simplicity with seamless gear shifts for effortless driving and comfortable journeys.
